Saturn V Rocket and Launch Pad

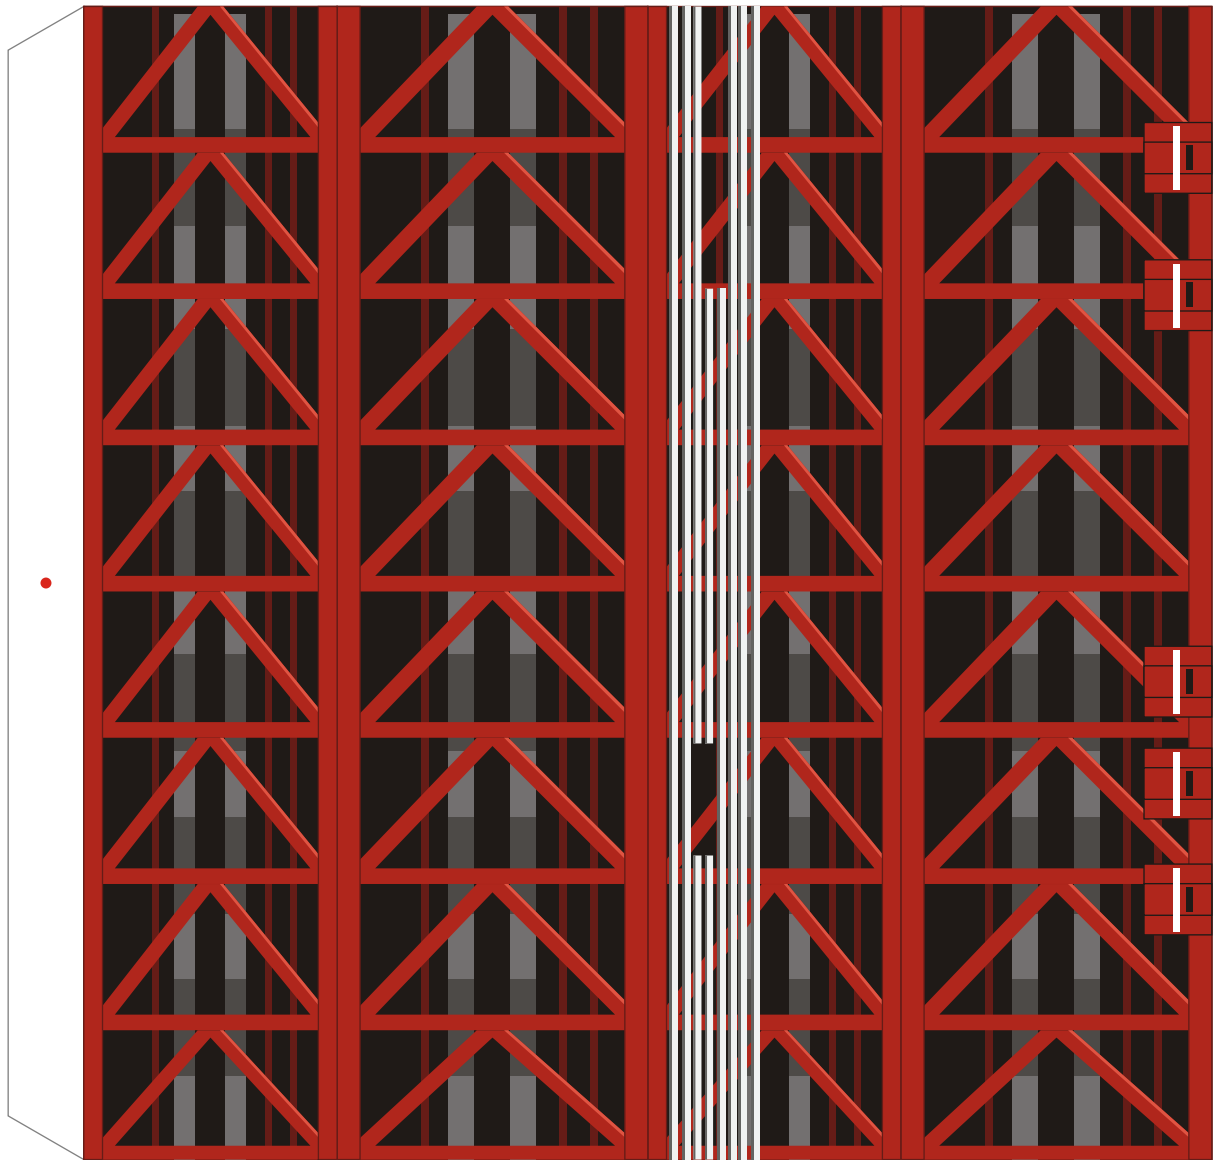

Scale 1:300

On July 20th 1969, this massive machine blasted out to the blue sky and entering mankind to a whole new level. This rocket Saturn V SA-506 was used to propelled 3 brave men to the space and finally stepped their feet on moon's soil accomplished their Apollo mission, the 11th mission. They are Neil A. Armstrong, Michael Collins and Edwin E. "Buzz" Aldrin, Jr. Saturn V was continue to be use to bring many astronauts to the moon until 5th times on Apollo 17 mission in 1972. Saturn V services ended in 1973 after accomplished Skylab program. The reason I made this model is because it's quite simple model. The complete model will be around 40 cm in height, the scale is 1:300. The template contains 9 pages of patterns.
